

HOW TO SCORE PRACTICE TEST 1

Section I: Multiple Choice

$$\frac{\text{Number Correct (out of 45)}}{\text{Number Correct (out of 45)}} \times 1.5000 = \frac{\text{Weighted Section I Score (Do not round)}}{\text{Weighted Section I Score (Do not round)}}$$

The official range used to score the AP changes each year, so use these numbers only as a baseline for your own progress through this book and to get an estimate of where you may need to grow.

Section II: Free Response

(See whether you can find a teacher or classmate to score your essays using the guidelines in Chapter 4.)

$$\begin{aligned} \text{Question 1} & \quad \frac{\text{Score (out of 6)}}{\text{Score (out of 6)}} \times 4.5833 = \frac{\text{Weighted Score (Do not round)}}{\text{Weighted Score (Do not round)}} \\ \text{Question 2} & \quad \frac{\text{Score (out of 6)}}{\text{Score (out of 6)}} \times 4.5833 = \frac{\text{Weighted Score (Do not round)}}{\text{Weighted Score (Do not round)}} \\ \text{Question 3} & \quad \frac{\text{Score (out of 6)}}{\text{Score (out of 6)}} \times 4.5833 = \frac{\text{Weighted Score (Do not round)}}{\text{Weighted Score (Do not round)}} \end{aligned}$$

AP Score Conversion Chart English Language and Composition	
Composite Score Range	AP Score
112–150	5
98–111	4
80–97	3
55–79	2
0–54	1

$$\text{Sum} = \frac{\text{Weighted Section II Score (Do not round)}}{\text{Weighted Section II Score (Do not round)}}$$

Composite Score

$$\frac{\text{Weighted Section I Score}}{\text{Weighted Section I Score}} + \frac{\text{Weighted Section II Score}}{\text{Weighted Section II Score}} = \frac{\text{Composite Score (Round to nearest whole number)}}{\text{Composite Score (Round to nearest whole number)}}$$
