

HOW TO SCORE PRACTICE TEST 1

When you take the real exam, the proctors will collect your test booklet and bubble sheet and send your bubble sheet to a processing center where a computer looks at the pattern of filled-in ovals on your bubble sheet and gives you a score. We couldn't include even a small computer with this book, so we are providing this more primitive way of scoring your exam.

Determining Your Score

STEP 1 Using the answer key, determine how many questions you got right and how many you got wrong on the test. Remember: Questions that you do not answer don't count as either right answers or wrong answers.

STEP 2 List the number of right answers here.

(A) _____

STEP 3 List the number of wrong answers here. Now divide that number by 4. (Use a calculator if you're feeling particularly lazy.)

(B) _____ \div 4 = (C) _____

(A) _____ - (C) _____ = _____

STEP 4 Subtract the number of wrong answers divided by 4 from the number of correct answers. Round this score to the nearest whole number. This is your raw score.

STEP 5 To determine your real score, take the number from Step 4 and look it up in the left column of the Score Conversion Table on the next page; the corresponding score on the right is your score on the exam.
