

## HOW TO SCORE PRACTICE TEST 2

When you take the real exam, the proctors will collect your test booklet and bubble sheet and send your bubble sheet to a processing center where a computer looks at the pattern of filled-in ovals on your bubble sheet and gives you a score. We couldn't include even a small computer with this book, so we are providing this more primitive way of scoring your exam.

### Determining Your Score

**STEP 1** Using the answer key, determine how many questions you got right and how many you got wrong on the test. Remember: Questions that you do not answer don't count as either right answers or wrong answers.

**STEP 2** List the number of right answers here.

(A) \_\_\_\_\_

**STEP 3** List the number of wrong answers here. Now divide that number by 4. (Use a calculator if you're feeling particularly lazy.)

(B) \_\_\_\_\_  $\div$  4 = (C) \_\_\_\_\_

(A) \_\_\_\_\_ - (C) \_\_\_\_\_ = \_\_\_\_\_

**STEP 4** Subtract the number of wrong answers divided by 4 from the number of correct answers. Round this score to the nearest whole number. This is your raw score.

**STEP 5** To determine your real score, take the number from Step 4 and look it up in the left column of the Score Conversion Table on the next page; the corresponding score on the right is your score on the exam.
